paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 95 Publisher: Posts Telecom Press Pub. Date :2009-03. This book is based on high Vocational planning electronic information materials designed circuit and electronics technology. a book written test materials. Experimental circuit and electronics technology students entering college after the first exposure to the basic course experiment profession. to improve student interest in the experiment is to study the dynamics of its course. so the selection of experiments in order to circuit and electronics technology. The main elements basis. According to the progress of the preparation of teaching materials. aims to deepen understanding of the theory. while in theory under the guidance of the experiment to analyze and solve problems. In order to better develop application-oriented technical personnel. improve their ability and overall quality. the author based on many years of experimental teaching has prepared this material. This book contains five chapters. introduces the basics of electronic measurement. commonly used instruments and their use. the circuit part of the experiment. some experimental electronic technology and comprehensive training. One part of the circuit were arranged in 11 experimental. electronic technology. part of the arrangement of five experiments. including the common components of the training part of the understanding. awareness and use of common electrical tools. meter installation and commissioning. The actual operation of the main book. the purpose of each experiment. including experimental. laboratory instruments. laboratory prep requirements. test procedures and test reports with the principles and thinking problems. This book can be used as vocational communications. electronics. non-computer science textbooks. but also can be used for reference to the relevant technical staff. More Contents: Chapter 1. the basics of measurement and error and error of measurement 1.1 the basic...
